Getting started with STG-950 and STM32CubeIDE

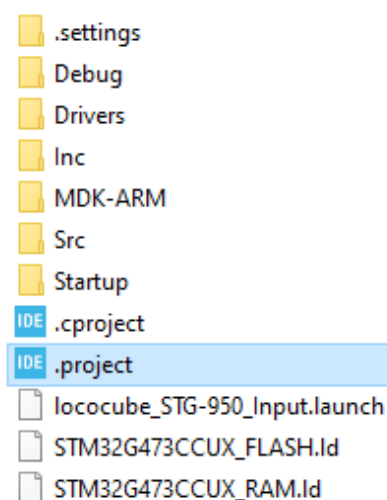

1.

Download and install the IDE, go to <https://www.st.com> and search for "STM32CubeIDE".

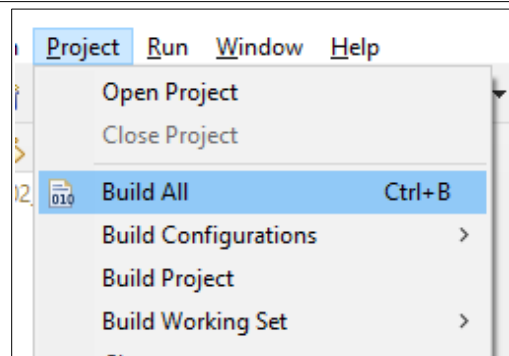

2.

Open the corresponding .project-file / .cproject-file in the respective folder you want to use.

3.

Compile the Project via the "Build All" button.

4.

After build finished with no errors you can flash or debug the project.
