## Getting started with STG-950 and STM32CubeIDE

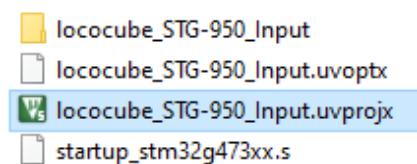

1.

Download and install arm KEIL  $\mu$ Vision, go to <https://www.keil.com/>.

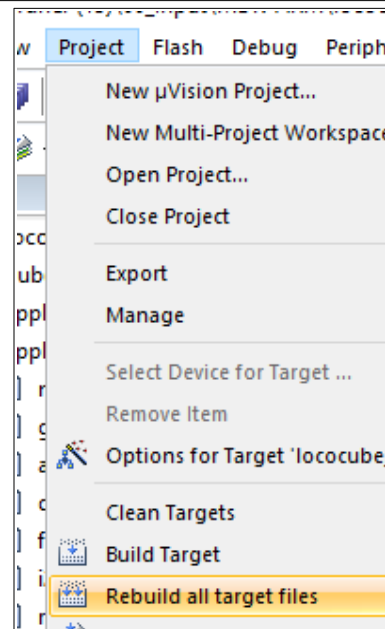

2.

Open the corresponding .uvprojx-file in the respective folder you want to use.

3.

Compile the Project via the “Rebuild all target files” button.

4.

After build finished with no errors you can flash or debug the project.
